Office Action Summary

## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27 are, drawn to an alloy, classified in class 420, subclass 8+.
  - II. Claims 28-29 are, drawn to a component of equipment, classified in class 148, subclass 320+.
  - III. Claims 30-33 are, drawn to a method of forming/using a component, classified in class 148, subclass 579+.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as composition and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the composition as claimed is not an obvious composition for making the product and the composition can be used for making a different product or (2) that the product as claimed can be made by another and materially different composition. In this case the product as claimed can be made by another and materially different composition such as pure ceramic material.
4. Inventions I-II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another

materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as pure ceramic components.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Mr. Charles W. Chandler on March 26, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### *Conclusion*

Applicant is reminded that when amendment and/or revision is required, applicant should therefore specifically point out the support for any amendments made to the disclosure. See MPEP § 2163.06 (a) and 37 C.F.R. § 1.119.
